PANEL DISCUSSION

PROTECT THE ENTERPRISE, PROTECT THE MARKET: THE EVOLUTION OF THREAT INTELLIGENCE

Iain Johnston

*Managing Director
Blackwired*

Gary Brailsford-Hart

*CISO City of London
Police*

Simon Newman

*CEO of Cyber Resilience
Centre for London*

Stephen Owen

*CISO eSure and Cyber
Resilience Commentator*

Matt Sumpter

*Cyber Underwriting
Director - CNA Hardy*

WORKSHOP

**DISCUSS WHAT SORT OF
THREAT INTELLIGENCE YOU
ARE FINDING MOST HELPFUL
IN ORDER TO PROTECT YOUR/
THE ENTERPRISE/ ASSIST IN
THE UNDERWRITING OF
CYBER INSURANCE**

SPECIAL GUEST
AUTHOR AND INFORMATION SECURITY EXPERT

Izak Oousthuisen
*Best Selling Author
& Cyber Commentator*

YOU DON'T NEED MILLION-POUND CYBERSECURITY BUDGET

- **Reduce the IT drama**
- **SMEs - 1 to 1000 employees including micro businesses**
- **Price sensitive - costs vs practical vs minimum security required**
- **Unlimited Support Model**
- **Cybersecurity challenges for SMEs:**
 - **Basic**
 - **Standard**

BASIC CHALLENGES

- **Misconfigurations**
desktops
- **Administrative access for**
everyone
- **No IT policy**
- **Systems not up to date**
- **Expired software**
- **No inventory**

93% of breaches could have been avoided.

Your system's as strong as your weakest link!

MORE BASIC CHALLENGES

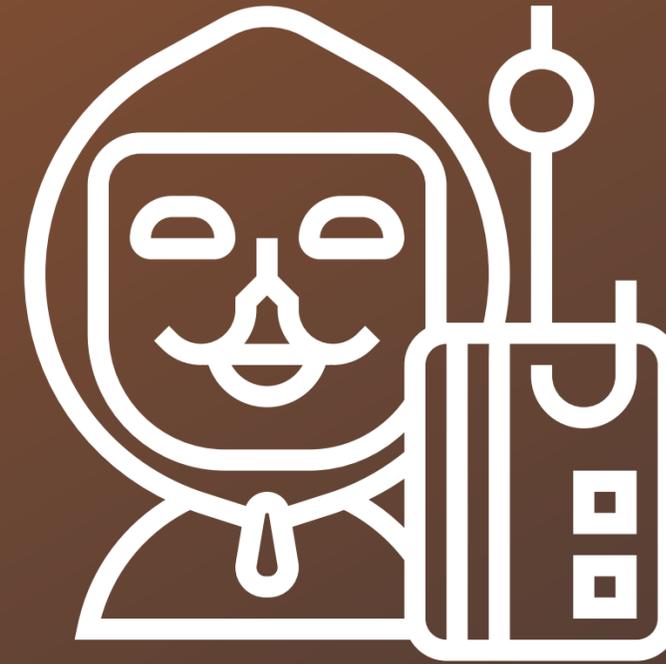

- **No backups**
- **Internal checks**
- **No MFA & password policies**
- **Illegal licenses**
- **Assumptions around using the cloud**
- **Anti virus and firewall only**

STANDARD CHALLENGES

- **Networks not managed**
- **Outdated systems**
- **Email security**
- **Staff security awareness training**
- **No MDM policy**

91% of all cyberattacks begin with a phishing email.

MORE STANDARD CHALLENGES

- **No email & data retention setup**
- **No password vault**
- **Limited or no security monitoring**
- **No supplier due diligence**
- **Dark Web scanning**

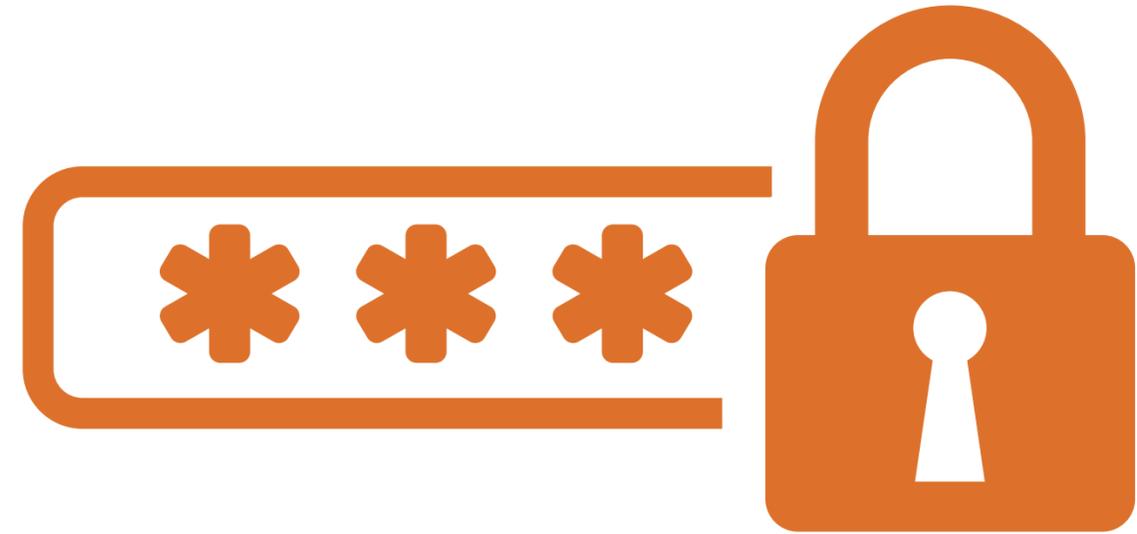

41% of internet users manage passwords across 10 to 25 websites and apps.

There's a cyberattack every 39 seconds!

WILL THESE PROBLEMS GO AWAY?

IT Security is like locking your house. It doesn't stop criminals but if it is good enough they will move to an easier target.

MINIMUM REQUIRED FRAMEWORK

- **Directory services**
- **SSO emails, workstations & files & VPN & Cloud**
- **Monitoring**
- **Network assets are manageable**
- **Security updates & monitoring**
- **Anti-Virus / EDR**
- **DNS filtering - Ransomware protection**
- **Data protection – Managed**

ONBOARDING CHECKS

- **Network, workstation & software inventory**
- **Security groups audit & verification**
- **Data protection location i.e. workstations**
- **Data protection selection – correct data**
- **Administrative access regulated.**
- **Retention polices emails, data & logs**
- **Email archiving**
- **Public DNS**
- **Password Polices**
- **MFA**
- **Client internal & supplier documentation**

FUTURE CHALLENGES

- **Internet of Things (IoT)**
- **Artificial Intelligence (AI)**
- **Software as a service (SaaS)**
- **Lack of awareness**
- **No clear standard**

Only 14% of SMEs are prepared by cyberattacks.

**Nearly 43% of cyberattacks target SMBs.
Over 43% of incidents are courses by human error.**

DISCUSSION

- **OVER 43% INCIDENTS ARE CAUSED BY HUMAN ERROR, DO YOU THINK CYBER AWARENESS TRAINING HELPS?**
- **WOULD YOU RECOMMEND CES?**

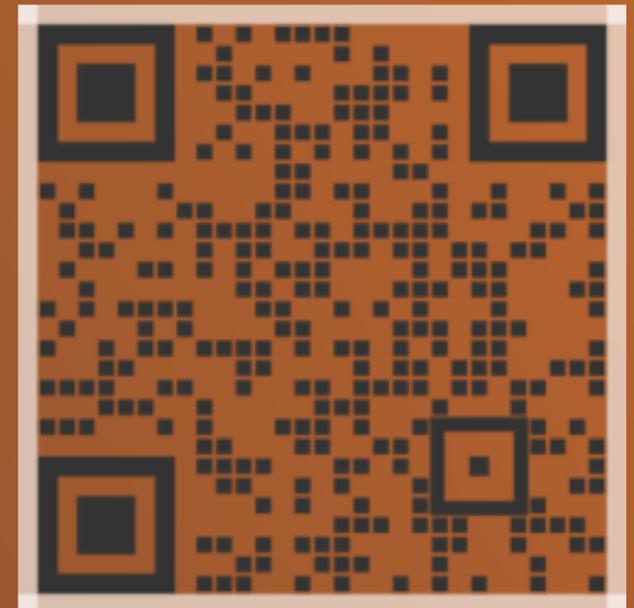

**THANK
YOU FOR
YOUR
TIME!**
